

Free on-line class!

Learn how to build stick and tissue flying model aircraft using modern techniques during an interactive live class!

20" span Skylark!

30" span Condor!

Students can choose to build one of the two above models specifically designed to be easy to build and fly.

- Class will be held 7pm – 8pm Wednesday evenings, starting February 22nd.
- The instructor will supply the plans and the knowledge.
- The students supply the *tools, materials and the enthusiasm!

The first class,(Feb. 22nd), will be an introduction during which students will choose which model they would like to build, we will discuss the tools and materials that should be on hand and the class agenda.

- Each class is taught live allowing students to build along with the instructor and to ask questions and receive immediate feedback.
- Students will be walked through the building process, culminating with lessons on balancing, trimming and test flying completed models.

*Tool and material list provided with sign up.
